

## Textit - Hgw 2082

**Other material names** Textit: fiber, textit j, textgumoid, EN Norma EN 60893 / IEC 893

**Material group:** Electrical insulation materials

Structural and electroinsulating material - cotton fabric as reinforcement and phenolic resin as binder. The material has excellent mechanical and electrical insulating properties, good workability and resistance to water, oils, petrol and weak acids. Suitable material for high pressure components.

### Typical applications:

- Gears.
- Pulleys.
- Parts of machinery and equipment.
- Switchgear cabinets.
- Insulating boards.
- Lining of sliding parts of presses.

**Material availability:** Material in stock at the manufacturer

#### Material properties table

<b>Specific weight</b>	1.40 g/cm <sup>3</sup>
<b>Antistatic material</b>	No
<b>Resistance - oils</b>	resistant
<b>Acid resistance</b>	resistant
<b>Durability - alcali</b>	resistant
<b>Food contact</b>	No

Engineering plastics are supplied in the form of bars, plates, strips, tubes and sheets. From the semi-finished products the company TechPlasty has regularly in stock, we also supply blanks.

All standard and special materials are designed to meet your specific requirements. Their mechanical, thermal, and electrical properties and chemical resistance satisfy the most demanding requirements and this allows them to work even in the most difficult conditions. If you need advice when choosing the appropriate material for your application, please contact us. We'll gladly advise you. You can utilize the long-term experience of our technical advisors free-of- charge, who can visit you right in your operation and solve your requirements for engineering plastics directly at the site of their usage.
